

Graham Thatch

Director of Project Management

Graham heads up Project Management at RoboVent. His primary job is to ensure that all projects are executed on time and within budget. He works across multiple teams at RoboVent to make sure that the customer gets the solution that will work best for their application.

Background

Graham joined RoboVent in 2008 as a CAD engineer, right after graduating from Eastern Michigan University. He moved into Project Management in 2017.

Areas of Expertise

- Project Management
- CAD

Education

Lindy earned his Bachelor of Science in CAD/CADD Drafting and Design Technology from Eastern Michigan University. He also has completed coursework through ACGIH.

Get to Know Graham

Graham aspires to be the Supreme Ruler, but in the meantime, he enjoys spending time with his family—primarily camping, fishing and attending baseball games. He and his wife, Laura, have a son and a daughter. He also works on a number of side projects and hobbies.

“My goal is to be the best resource I can be for the industrial filtration industry.”
