

Jacques Kregting

Technical Sales and Application Engineer

Jacques is a highly qualified solution designer and engineer with more than 30 years of industry experience. At RoboVent, he designs custom dust collection and industrial ventilation solutions for a variety of industries, applying his extensive experience to solve tough air quality challenges. He works closely with the Solution Sales team to ensure that solutions are safe, efficient, and tailored to exact customer requirements.

Background

Jacques joined RoboVent in 2020 as a Technical Sales Engineer. He brings extensive industry experience, with previous roles in engineering and design for JTK Consulting, Camfil Farr, Steelcraft – Filtrex and American Metal Products. He started his career as a greenhouse manager.

Areas of Expertise

- Dust Collection System Design and Engineering
- Filters and Filter Media
- Industrial Air Filtration

Education

Jacques holds a Bachelor of Science in Mechanical Engineering from MTS Nijmegen in The Netherlands and a Bachelor of Arts in Applied Horticulture from Leidse Onderwijs Instellingen, Leiderdorp.

Get to Know Jacques

Jacques likes to stay active. He volunteered with 5K races to raise money for all kinds of organizations, including St. Jude. He used to ride his bicycle 250 miles per week and spend time sailing, but these days, he spends more time walking and gardening. He is one of ten children and is now married with one grown child and two grandkids. In his younger years, his friends called him "Bloodhound."

"It doesn't matter how many certificates or accreditations you have on the wall or stuffed in a drawer —if you don't have common sense, all those certificates don't matter."
