

Manual Welding Tables

WITH BACKDRAFT FUME EXTRACTION

VentBoss S220

VentBoss S230

Manual Welding Tables With Backdraft Fume Extraction

These all-in-one welding workstations save space and provide maximum convenience for welders: just connect to power and compressed air, place your weldment on the work surface, and start welding. With the VentBoss Series 200 workstations, getting your fabrication shop or weld school up and running has never been easier.

- Powerful backdraft weld fume extraction
- Fast setup and plug-and-play operation
- Compact space-saving design
- Generous work surface for manual welding

Built-in Weld Fume Protection

A welding booth with built-in backdraft extraction keeps welders safe by pulling fumes up and away from the breathing zone. Welders don't need to worry about the exact placement of the welded piece on the table, and they don't need to continually readjust a fume arm—they just place the piece on the work surface and weld. It's a simple and effective solution for stationary tabletop manual welding of small to medium-sized parts.

The Perfect All-in-One Workstation for:

- Fabrication Shops
- Weld Schools/Technical Schools
- Maker Spaces & Art Studios
- Automotive Workshops & Repair Centers
- In-House Maintenance and Repair Shops

Talk to a RoboVent solutions expert today to find your perfect backdraft welding station.

VentBoss S200 Series Backdraft Weld Tables

VentBoss S220 and S230 weld tables are built to last and designed for efficient operation. These plug-and-play workstations are easy to set up and operate and have all the features manual welders are looking for. For light- to medium-duty manual welding applications.

Product Features

- **Heavy Duty Construction:** 14-gauge steel construction and a durable baked-on powder coat finish, backed by our quality-built guarantee.
- **High-Performance Blower:** High output air volume with 2000 CFM max airflow.
- **Quiet Operation:** Built-in acoustical lining of high-density sound-absorbing materials to reduce motor and blower noises.
- **Built-in Spark Arrestance:** The internal 2-layer SparkOut plenum quickly extinguishes sparks.
- **Easy Filter Access:** No special tools needed – just release two latches to open the filter plenum.
- **Filter Cleaning:** On-board compressed air filter pulsing system to maximize filter life.
- **Generous Storage Compartment:** The S230 features a storage compartment built-in place to put the welder or other tools to keep them out of the way during operation.

VentBoss S220

With a generous 48" wide by 30" deep worksurface, the VentBoss S220 is a great option for weld schools and small shops.

Full dimensions: 90"H x 48"W x 44"D

*Shown with optional curtain package

VentBoss S230

Need more workspace? The VentBoss S230 gives you a 60" x 30" weld table surface for larger weldments or training applications.

- Generous Storage Compartment (S230 model only)

Full dimensions: 90"H x 60"W x 44"D

*Shown with optional curtain package
